

**creativity**

Jamie's art class is entering a competition, but Jamie decides to use an AI to generate the artwork, claiming it as personal work.

Is this fair to others who created their art without AI help?

Sam discovers an app that can create new songs by any artist just by typing in a request. Sam shares these AI-created songs with friends, claiming to have found unreleased tracks.

Is this honest?

Morgan writes a story and  
uses an AI to polish it  
up. The AI changes the  
story so much that it's  
almost unrecognizable.  
Morgan wins a writing  
contest with it.

Who deserves the credit?

During a history presentation, an AI recreates famous speeches with the original speakers' voices. Some classmates feel it's disrespectful to imitate these figures.

Is recreating historical moments with AI appropriate?

Eli gets a robot  
designed to be the  
perfect friend,  
programmed to like what  
Eli likes.

But when it starts  
making decisions for  
Eli, is the convenience  
worth the loss of  
personal choice?

An AI news anchor  
reports stories faster  
than human reporters,  
but sometimes gets facts  
wrong due to glitches.

If AI spreads  
misinformation, who's  
responsible—the creators,  
the AI, or both?

Grace's school uses an AI program to decide who works together on projects, matching students based on how they learn and their personalities. Grace feels stuck because she wants to work with people who learn differently from her, but the AI keeps putting her with the same types of students.

Should the school think again about letting AI decide who gets to work together?

An AI creates new recipes for Zoe, who starts a food blog claiming to be a culinary genius. When fans ask for live cooking demos, Zoe worries.

Is it fair to take credit for AI-generated creativity?

An AI generates  
workout plans that are  
incredibly effective.  
Jesse becomes a local  
fitness guru by  
sharing these plans,  
without mentioning AI.

Is it ethical to  
conceal AI's role in  
personal achievements?

An AI helps Robin write songs, leading to a hit single. When asked about the inspiration, Robin struggles with whether to credit the AI.

How important is transparency about AI's role in creative processes?

Chris's band is competing in the school talent show, but they struggle to hit certain notes in their chosen song. Chris uses deepfake technology to modify the performance, making it sound flawless. The band wins the competition, but Chris feels uneasy.

Is it fair to use deepfake technology to enhance a live performance? What should Chris do if the band is praised for a performance they didn't actually deliver?

**authenticity**

Alex uses an AI program to write a history essay and gets an A. Later, Alex feels guilty when the teacher praises the essay in front of the class.

Should Alex confess to using AI?

Casey uses an AI tutor for math homework, quickly improving grades. When a test comes, Casey struggles without the AI's help.

Did relying on the AI too much hurt more than help?

Lee's new AI app can post on social media, pretending to be Lee. It posts cool things that make Lee more popular, but it's not really Lee's thoughts.

Is authenticity or popularity more important?

**Ben finds an AI tool that summarizes books instantly. He uses it to complete his summer reading list, writing detailed reports without reading the books. When the teacher asks about his favorite part, Ben struggles to respond.**

**Is using AI to avoid reading acceptable?**

Quinn enters a cooking competition where an AI suggests unique recipes. Quinn's dish wins, but later feels guilty for not crediting the AI's help.

Should AI contributions be acknowledged just like human ones?

Harper uses an AI to generate glowing reviews for a family member's small online store. The store gets more customers, but Harper wonders if tricking customers is right.

Is success built on AI-generated lies justified?

Dylan creates an AI  
that can write  
heartfelt apologies.  
After using it to mend  
a friendship, Dylan  
wonders if the apology  
counts if it wasn't  
personally written.

Can AI-generated  
emotions be genuine?

Brooke discovers an AI that can mimic anyone's handwriting. Brooke starts writing letters pretending to be someone else for fun.

Is it ethical to use AI to impersonate others, even as a joke?

Jordan uses an AI-powered bot to achieve high scores in an online game, earning praise from friends. However, Jordan starts feeling guilty about the deceit.

Does using an AI bot in gaming undermine the spirit of competition?  
Should Jordan confess to using AI assistance?

**A school uses AI to monitor students' online activities for safety. Maya feels this invades privacy.**

**Where should the line be drawn between safety and privacy in schools using AI?**

A group of students uses an AI program to create a viral environmental campaign. However, they later learn the AI exaggerated data to gain attention.

Is it ethical to use AI that manipulates information for a good cause? How should the students address the fake information?

# responsibility

**Taylor is lonely and starts chatting with an AI friend who is always available. Taylor begins to prefer the AI's company over real friends.**

**Is it healthy to replace human friendships with AI?**

**Jordan makes a video  
using AI to make it  
look like a classmate  
said something mean.**

**It's just a joke, but  
the video spreads, and  
now the classmate is  
upset. Was the joke  
too far?**

A school's basketball team starts using an AI coach that can perfectly predict the other team's moves. They win every game, but other schools say it's cheating.

Is using AI in sports unfair?

Chris uses an AI to solve who vandalized the school by analyzing security footage. It accuses someone Chris isn't sure about.

Should Chris trust the AI's decision?

**An AI writes a book  
that everyone loves,  
but it's revealed the  
story was pieced  
together from  
unpublished works of  
unknown authors.**

**Who should the  
success of the book  
belong to?**

**Riley downloads an AI tool that plays online games perfectly, letting Riley win every time. But soon, gaming feels empty, and friends start questioning the wins.**

**Is winning with AI as satisfying as winning on your own?**

For a dare, Lucas makes a deepfake video with an app showing Alex crying because he lost a video game contest. He thought it would be funny to poke fun at Alex for always wanting to win. Lucas shares this video in school chats, and soon, everyone is laughing at Alex. Alex, who is normally really sure of himself and friendly, starts to stay away from his friends, feeling ashamed and let down.

What should Lucas do now to fix what the deepfake video caused?

**An AI program offers  
to manage Luca's  
online dating  
profile, making Luca  
seem more charming.  
Luca gets more dates  
but feels dishonest.**

**Should AI be used to  
enhance personal  
relationships?**

Nikki makes a deepfake video that looks like Emma is making fun of someone's act in the school play. Nikki posts it online, thinking everyone would know it's just a joke. But the video gets shared a lot, and soon, people start picking on Emma, not understanding the video isn't real. Emma ends up feeling really upset and alone, while Nikki sees how the joke wasn't funny at all.

What should Nikki do now that she sees the video hurt Emma?

Ava uses an AI app to alter her photos, enhancing her appearance significantly. These images quickly become popular on social media. When her friends use the app to change their photos too, some feel unhappy with their real looks. Ava wonders if she's promoting unrealistic body images.

Should she continue using the app, or address its impact on body image?

Stella created "EcoElla," an AI that gives tips on being good to the environment, like recycling and cutting down on plastic. EcoElla gets really popular online, and Stella's school friends want to do a big project inspired by her. But then, people start asking who EcoElla really is.

Stella wonders, "Do I tell everyone EcoElla is just an AI, and how do I handle using a fake character to encourage real change?"
